7–10 business days

YOUR GUIDE

LeadFlow HQ

THE OVERVIEW

What you're getting

Your platform is three connected pieces that run your rental business end-to-end — from the moment a customer lands on your site to the day the car comes back.

1 Your branded booking website

A fast, mobile-first site on your own web address where customers browse your fleet, pick dates, e-sign the rental agreement, and pay by card — with a built-in live chat widget.

2 Your owner dashboard ("Fleet Command")

A private admin login to approve bookings, manage your fleet and availability, track revenue, handle pickups/returns & damage, and issue refunds — all in real time.

3 Automated payments & messaging

Secure card payments through Stripe, plus automatic email & text confirmations, pickup/return reminders, and owner alerts — no manual follow-up required.

How this guide works

Each step below is tagged so you always know who's doing what. **YOU** means we need something from you. **OUR TEAM** means we handle it. Work through the **"What we need from you"** list first — that's what unblocks everything else.

PHASE 1 · YOUR CHECKLIST

What we need from you

Gather these items and send them over in one batch. The sooner we have them, the sooner you go live. Tick each box as you complete it.

YOU

You provide / decide

OUR TEAM

We set it up

☐**Business identity & branding**

YOU

Business name, logo (PNG/SVG), brand color, contact phone & email, physical/service address, and operating hours.

☐**Your web address (domain)**

YOU

The domain you want customers to visit (e.g. *yourrental.com*). If you don't own one yet, we'll help you register it.

☐**Your fleet list**

YOU

For each vehicle: year, make, model, photos, daily rate, deposit, mileage limits, and any add-ons. A simple spreadsheet is perfect — we'll load it for you.

☐**Rental terms & policies**

YOU

Minimum age, deposit & cancellation rules, insurance requirements, mileage/fuel policy, and late-return fees. We turn these into your Terms of Service and Privacy Policy pages.

☐**Stripe payment account**

YOU

Create (or connect) a Stripe account so payouts go straight to your bank. ~15 min You'll need your business & bank details handy. We connect it to the site.

☐**Sending email address**

YOU

The "from" address for booking confirmations (e.g. *bookings@yourrental.com*) and the owner email that should receive new-booking alerts.

☐**Reviews & photos optional**

YOU

Customer testimonials and a few hero/lifestyle photos make the site convert better. Send what you have — we'll polish the rest.

PHASE 2 · OUR BUILD

What our team sets up

Once we have your Phase 1 items, here's what happens behind the scenes. No action needed from you — this is for transparency.

- ☐ **Provision your private database** OUR TEAM
We spin up your own secure Supabase project for bookings, customers, fleet, and payments — isolated to your business.
- ☐ **Brand & deploy your booking site** OUR TEAM
We apply your logo, colors, fleet, and policies, then deploy the customer site and your owner dashboard to fast global hosting.
- ☐ **Connect payments end-to-end** OUR TEAM
We link your Stripe account, wire up secure card capture and deposit holds, and configure payment webhooks so every transaction is tracked.
- ☐ **Set up email & text automation** OUR TEAM
We verify your sending domain and connect the messaging engine so confirmations, reminders, and owner alerts fire automatically at every booking stage.
- ☐ **Connect your domain & secure it (SSL)** OUR TEAM
We point your domain to the site, issue HTTPS certificates, and set up the admin subdomain for your dashboard.
- ☐ **Add live chat & create your login** OUR TEAM
We install the live-chat widget and create your secure owner account so you can sign in to the dashboard on day one.

One thing we may ask you for

To connect your domain and verify your email, we'll send you 3–5 small DNS records to add at your domain registrar (or you can grant us temporary access and we'll do it). It takes a few minutes and is the only "technical" step on your side.

PHASE 3 · GO-LIVE CHECKLIST

Before we flip the switch

We run this test pass together so you can see the whole flow working before real customers ever touch it.

☐

Place a test booking end-to-end

TOGETHER

Browse fleet → select dates → sign agreement → pay with a test card → confirm it appears in your dashboard.

☐

Confirm a real payment & payout

TOGETHER

Run one live charge and a refund to verify money flows to your Stripe balance and bank correctly.

☐

Verify every notification fires

TOGETHER

Customer confirmation, owner alert, and pickup/return reminders all arrive by email and text.

☐

Review your site on mobile & desktop

YOU

You do a final read-through of fleet, pricing, photos, and policy pages and approve the copy.

☐

Sign in to your dashboard

YOU

Confirm your owner login works and you're comfortable approving bookings and managing the fleet.

☐

Launch 🎉

OUR TEAM

We point your live domain at the site and you're open for business.

What happens after launch

- Hands-on dashboard walkthrough
- Quick-reference owner guide
- Ongoing hosting, updates & backups
- Support channel for questions

Keep handy for support

- Your Stripe login
- Your domain registrar login
- Your owner dashboard login
- Best contact for booking alerts
